

Eurowood 3D Systems

ACE Architectural Panels Eurowood Aluminium 3D Systems are a range of Snap in Batten systems which can be used as Cladding, Soffit, Ceiling and Feature Panel systems finished in either a High Performance Powder-coat finish or Timber Image feature. The Aluminium and Coating technology lowers the lifetime maintenance costs of your project in a variety of environments and provides excellent UV Resistance and weathering performance.

The ACE Architectural Panels Eurowood 3D Systems range offers a variety of standard profile lengths and sizes to suit all projects.

Features

- **Colour range** – Wide choice of Timber Image Specie finishes to choose from Plus a Large range of Powder-coat colour finishes.
- **Excellent Weathering Performance** – Exterior or Interior use - Continue to look “as new” for years. Without blotching or fading.
- **Low Maintenance with Long Term Durability** – No need for Oiling, Re-coating over the life of the product, simply keep it clean for long lasting finishes.
- **Non Combustible** – Tested to Australian Standard AS1530.3. Perfect for installation in Bush Fire prone areas.
- **Strong Durable product** – Battens are guaranteed not to warp, crack, check or splinter as Natural Timber may. Highly resistant to damage caused by Termites, pests and Fungal decay.
- **Concealed Fix method** – Snap in sections allow for all systems to offer a Concealed fixing method. No need for unsightly fixings
