

Commercial Range

ACE Architectural Panels Pre Finished Compressed Fibre Cement Commercial Range of Panels are coated in a UT100 High Performance two pack Polyurethane Coating system. This technology lowers the lifetime maintenance costs of your project in a variety of environments and gives excellent UV Resistance and weathering performance.

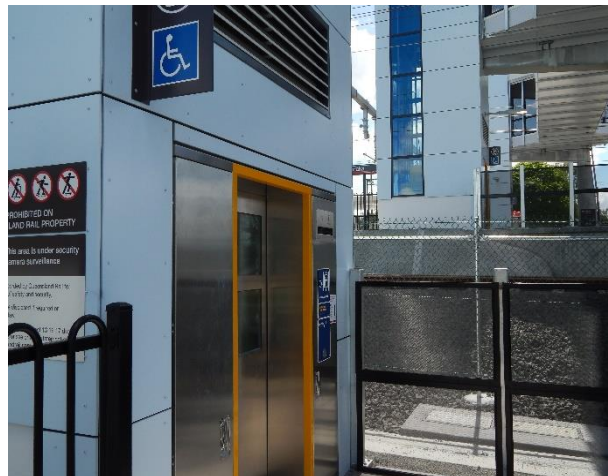

The ACE Architectural Panels Pre Finished Compressed Fibre Cement Commercial Range offer a variety of standard sheet thicknesses and sizes up to 1200mm x 3000mm.

Features

- **Colour range** – Large range of Standard Colours to choose from with Metallic and Pearl finishes also available.
- **Excellent Weathering Performance** – Continue to look “as new” for years. Without blotching or fading.
- **Excellent Chemical resistance** – For the quick and easy removal of Graffiti without affecting the panel surface.
- **Low Maintenance with Long Term Durability** – Impervious to chemicals and Solvents allowing easy clean ability against pollution and general airborne emissions.
- **Sound Barrier** – The use of 9mm and 12mm Compressed Fibre Cement as a substrate offers a high level sound barrier which makes this product ideal for use in Airports, Motorways, Railway Stations and Schools.
- **Strong Bacteria Resistant** – Excellent resistance against Bacteria and Mould.
- **System** – Available in either James Hardie or CSR sheeting to suit onsite framing system. Keeping with manufacturer’s Warranty Requirements.

Typical Applications

- Fascia’s and Façade systems
- Sun Blade and Sun Hood panels
- Tunnels
- Bridges
- Motorway Barrier / Sound control
- Interior Feature Panels
