

# Hygiene Aqua Ceiling Tile

*ACE Architectural Panels Hygiene Aqua Ceiling Tiles are a completely sealed Moisture Impervious Pre finished Fibre Cement panel which can be produced in a variety of sizes to suit your site requirements. The Hygiene Aqua tiles are intended for use in Wet areas and areas of High Humidity and offer an excellent resistance against Bacteria and Moulds. The strong chemical resistance allows this tile to perform in areas where there is a high level of contamination and frequent cleaning is required. The Hygiene Aqua tiles are manufactured with a 9mm Fibre Cement and coated in an Inflonito High Performance two pack Fluoropolymer resin base system on the face and edges with a moisture impervious sealer to the rear of the tile.*

- Edge Detail – Square Edge
- Thickness – 9mm
- Size mm – 1200x600, 600x600
- Colour – White Standard
- Custom Colour – Various

#### *Cleanability –*

Daily dusting, vacuum cleaning, manual wet washing and wiping. Can withstand the use of common disinfecting chemicals.

#### *Cuts and Penetrations –*

Cuts and Penetrations are acceptable within this tile. All exposed edges must be resealed with the Inflonito touch up paint system or the Sealer coat to maintain the moisture barrier of the tile.

#### *Moisture Resistance –*

The Hygiene Aqua tile is a completely moisture impervious tile. The Fibre Cement substrate and Inflonito coating system offers a superior barrier against particles and moisture.
